

Workshop 5 - Hale Studio - INSPIRE Data Transformation (WeTransform)

Workshop preparation, participants can install Hale Studio, and then we will work further on a web based platform of Hale Connect.

Hale Studio can be downloaded from this site: <https://www.wetransform.to/downloads/>

As you will see, it is available for Win OS, Linux and Mac operating systems, so all participants should be able to get the software.

On the same link, we have information available for the updates and documentation as well.
